Brain Map Tour

The Brain is an incredible collection of Lobes, ventricles, and systems working together to enable you to function. The brain is made up of several parts and sections, each controlling and responsible for different functions of the human body and mind. In the following pages we will identify each part of the brain and its functions.

The sections of the brain that will be covered are:

(Click on a section below)

[The Frontal Lobes](#)

[The Parietal Lobes](#)

[The Temporal Lobes](#)

[The Occipital Lobes](#)

[The Cerebellum](#)

[The Brain Stem](#)

[The Corpus Callosum](#)

[The Limbic System and Thalamus](#)
